CUMULATIVE INDEX

Vol. 17 (1983), Issues 1-12

Behind the Bottom Line (Dr. Carl Nordstrom)
Cheaper Oil, A Mixed Blessing from; May 1983 (17:5), p. 20.
Cottage Shops: Starting Small in New Mexico; Nov. 1983 (17:11), p. 22.
High-Tech Hardball vs. Team Spirit; June 1983 (17:6), p. 18.
International Competition, Rethinking; Aug. 1983 (17:8), p. 16.
International Trade: the Squeeze Gets Tighter; Feb. 1983 (17:2), p. 16.
Photonics 1983: Riding Out the Recession; March 1983 (17:3), p. 16.
Photonics' Five Year Record: Growing, but Slowing; Apr. 1983 (17:4), p. 18.
Post-Recession Progress, A Year of; Oct. 1983 (17:10), p. 20.
Recession, A Stubborn; Jan. 1983 (17:1), p. 14.
Recovery, Waiting for the; July 1983 (17:7), p. 16.
Soviets' Barren Soil for Innovation; December 1983 (17:12), p. 18.
Sweden's Photonics: Order and Inventiveness; Sept. 1983 (17:9), p. 18.

Calculator/Desktop Computer Programs
Design and the Desktop Face to Face (Douglas C. Sinclair); May 1983 (17:5), p. 77.
Optical Design with a Microcomputer (E.W. Cross/D.W. Small); Dec. 1983 (17:12), p. 58.

Coatings
Coating Department, Creating a (Robert Hogrefe); Apr. 1983 (17:4), p. 85.
Coatings on the Move: Technology Rises to New Challenges (Philip Baumeister); Oct. 1983 (17:10), p. 71.
Optical Coating Equipment, How to Specify (Peter R. Denton/Bawa Singh); May 1983 (17:5), p. 44.
Technology Trends 1983: Coatings; Jan. 1983 (17:1), p. 70.
Transparent EC Coatings, How to Specify (Clark Bright); Part I: June 1983 (17:6), p. 37; Part II: July 1983 (17:7), p. 35.

Company Profiles
Battelle Columbus: R&D for Hire (Thomas Noble); Sept. 1983 (17:9), p. 84.
Coherent: Taking Command on Many Fronts; Feb. 1983 (17:2), p. 91.
NV Philips: Light from a Dutch Source (Robert S. Clark); Sept. 1983 (17:9), p. 59.

Computer Graphics
Computer Graphics: An Industry in Flux; July 1983 (17:7), p. 65.
Technology Trends 1983: Computer Graphics; Jan. 1983 (17:1), p. 63.

Cryogenics
Miniature Refrigerators for Cooling Detectors (Robert Wolfe/Robert M. Duboc, Jr.); July 1983 (17:7), p. 52.

Designer's Handbook
Computer Control for Grinding and Polishing (Robert A. Jones); Aug. 1983 (17:8), p. 34.
Fiber Optic Data Links, Part I: The Basics (Applications Staff, Dynamic Measurements); Sept. 1983 (17:9), p. 35; Part II: Choosing Input and Output Devices; Oct. 1983 (17:10), p. 41; Part III: Factors in Optimizing a Complete System; Nov. 1983 (17:11), p. 42.
Helium-Neon Laser; Part I: What It Is and How it Works (Bhogi Patel); Jan. 1983 (17:1), p. 33; Part II: Applications; Feb. 1983 (17:2), p. 33; Part III: Putting It All Together; Mar. 1983 (17:3), p. 34; Part IV: How To Buy One; Apr. 1983 (17:4), p. 38.
Optical Coating Equipment, How to Specify (Peter R. Denton/Bawa Singh); May 1983 (17:5), p. 44.
Testing Fiber Optic Systems (E.Y. Nakagawa); Dec. 1983 (17:12), p. 34.
Transparent EC Coatings, How to Specify (Clark Bright), Part I: June 1983 (17:6), p. 37; Part II: July 1983 (17:7), p. 35.

Detectors
Frequency Response in Photomultipliers (H.D. Wolpert); Dec. 1983 (17:12), p. 71.
IR Detector Roundup; Feb. 1983 (17:2), p. 56.

Editorials
Export Controls: Their Own Worst Enemy; August 1983 (17:8), p. 6.
High-Tech Counterattack; July 1983 (17:7), p. 6.
High-Technology Bandwagon; Apr. 1983 (17:4), p. 6.
Laser Weapons in Space; May 1983 (17:5), p. 6.
Photovoltaics, Let's Hear It for; Feb. 1983 (17:2), p. 6.
R&D, The President's Budget; Mar. 1983 (17:3), p. 6.
Science Education, The Crisis in; Sept. 1983 (17:9), p. 6.
Scientific Illiteracy, Combatting; Jan. 1983 (17:1), p. 6.
Seedbed (Bell Labs) with an Uncertain Future; Oct. 1983 (17:10), p. 6.
Unified Trade Policy Needed; June 1983 (17:6), p. 6.
We Must Be Doing Something Right; Nov. 1983 (17:11), p. 6.

Fiber Optics/Communications
Connector Design: Controlling Losses (Terry Bowen/John Ashman); Feb. 1983 (17:2), p. 43.
LANs, ABCs of (Michael H. Coden/Frederick W. Scholl); Aug. 1983 (17:8), p. 47.
Laser Diodes, Beating Divergence in; May 1983 (17:5), p. 63.
Fiber Fabrication and Materials, New Light on; July 1983 (17:7), p. 47.
Fiber Measurement Standards, Progress Towards (R.L. Gallawa/D.L. Franzen); Apr. 1983 (17:4), p. 55.
Fiber Optic Data Links, Part I: The Basics (Applications Staff, Dynamic Measurements); Sept. 1983 (17:9), p. 35; Part II: Choosing Input and Output Devices; Oct. 1983 (17:10), p. 41; Part III: Factors in Optimizing a Complete System; Nov. 1983 (17:11), p. 42.
Glass Sphere Lenses for Better Coupling (Norman Nager); Sept. 1983 (17:9), p. 52.
Optical Communications of the Future: Patents Point the Way; Oct. 1983 (17:10), p. 77.
OTDR Puts Fibers to the Test (Christophe Flatau); Mar. 1983 (17:3), p. 47.
Sensors, Making Sense of Fiber Optic (Keith H. Wanser/Raymond E. Wagoner); Oct. 1983 (17:10), p. 61.
Single-Mode, Multiple Gains with; June 1983 (17:6), p. 53.
Splicing, Field Tools for (W.F. Toney); November 1983 (17:11), p. 57.
Technology Trends 1983: Fiber Optic Communications; Jan. 1983 (17:1), p. 61; Power and Energy Measurement; Jan. 1983 (17:1), p. 78.
Testing Fiber Optic Systems (E.Y. Nakagawa); Dec. 1983 (17:12), p. 34.
Underwater Fiber Optics (Gordon R. Petrie); Dec. 1983 (17:12), p. 51.
Video on the Transparent Highway (Richard Cerny/Tad Witkowicz); Aug. 1983 (17:8), p. 50.

Holography
Applications of Holographic Elements (Thomas Mikes); Mar. 1983 (17:3), p. 40.
Technology Trends 1983: Holography; Jan. 1983 (17:1), p. 79.

CUMULATIVE INDEX

Vol. 17 (1983), Issues 1-12

Behind the Bottom Line (Dr. Carl Nordstrom)
Cheaper Oil, A Mixed Blessing from; May 1983 (17:5), p. 20.
Cottage Shops: Starting Small in New Mexico; Nov. 1983 (17:11), p. 22.
High-Tech Hardball vs. Team Spirit; June 1983 (17:6), p. 18.
International Competition, Rethinking; Aug. 1983 (17:8), p. 16.
International Trade: the Squeeze Gets Tighter; Feb. 1983 (17:2), p. 16.
Photonics 1983: Riding Out the Recession; March 1983 (17:3), p. 16.
Photonics' Five Year Record: Growing, but Slowing; Apr. 1983 (17:4), p. 18.

Holography
Applications of Holographic Elements (Thomas Mikes); Mar. 1983 (17:3), p. 40.
Technology Trends 1983: Holography; Jan. 1983 (17:1), p. 79.

Imaging and Display
Digital Prospecting for Third-World Resources (James Deigan); Nov. 1983 (17:11), p. 67.
Machine Vision Tells the Difference (David V. King/David L. Hudson); June 1983 (17:6), p. 62.
Military Devices; Dec. 1983 (17:12-International), p. I-1.
Streak Technology: Full Speed Ahead; Aug. 1983 (17:8), p. 74.
Technology Trends 1983: Imaging; Jan. 1983 (17:1), p. 73.
Thermal Imaging: Electronics' Reliability Watchdog (Richard W. Sherman); July 1983 (17:7), p. 57.
3-D Display, a New Candidate for (Jeremy M. Harris); June 1983 (17:6), p. 45.

Infrared Technology
IR Detector Roundup; Feb. 1983 (17:2), p. 56.
Infrared Technology Aids Customs' Drug Search; Feb. 1983 (17:2), p. 36.
Refractive Scanning: A New Approach to Infrared Spectroscopy (J. Fenton Williams); Mar. 1983 (17:3), p. 59.

Integrated Optics
Integrated Optics: Strides Toward the Single Chip (Lynn D. Hutcheson); Apr. 1983 (17:4), p. 47.

Lasers
Cancer: Fighting with Lasers (Robert S. Scott); May 1983 (17:5), p. 54.
Computer to Plate: Raster Data Control for Lasers in Printing (R.J. Prichard); July 1983 (17:7), p. 61.
CO_2 Laser Update (John Post Wheeler); Dec. 1983 (17:12), p. 64.
Free-Electron Laser: Medicine's Rising Star (J. Timothy Riordan); July 1983 (17:7), p. 40.
Helium-Neon Laser; Part I: What It Is and How It Works (Bhogi Patel); Jan. 1983 (17:1), p. 33; Part II: Applications; Feb. 1983 (17:2), p. 33; Part III: Putting It All Together; Mar. 1983 (17:3), p. 34; Part IV: How to Buy One; Apr. 1983 (17:4), p. 38.
Job Shops: Two Industry Views (Laurence S. Derose/Larry P. Smetana); Mar. 1983 (17:3), p. 68.
Laser Fusion in the Home Stretch (J. Timothy Riordan); Dec. 1983 (17:12), p. 42.
Laser Gunsights for Rifles and Pistols: Feb. 1983 (17:2), p. 38.
Laser Projection Platemaking: An Economical Alternative (H.D. Wolpert); Nov. 1983 (17:11), p. 48.
Laser Weapons: Stalking the Ultimate Defense (J. Timothy Riordan); Nov. 1983 (17:11), p. 72.
Lasers Make it to the Shop Floor (Joe Leece); June 1983 (17:6-International), p. I-1.
Lasers on the Line (Robert S. Clark); Sept. 1983 (17:9), p. 81.
Soldering (Laser Reflow) with Light (Carl Miller); May 1983 (17:5), p. 83.
Technology Trends 1983: Lasers; Jan. 1983 (17:1), p. 48.

Materials and Chemicals
Infrared, Action in the (John A. Detrio); Sept. 1983 (17:9), p. 74.
Optical Plastics, Part I: Methods and Materials (H.D. Wolpert); Feb. 1983 (17:2), p. 68; Part II: Manufacturing and Production Tolerances; Mar. 1983 (17:3), p. 63.
Polishing Alumina, The No-Sleek (Paul J. Yancey); Sept. 1983 (17:9), p. 76.
SLS (Strained-Layer Superlattices); Sept. 1983 (17:9), p. 73.

Optical Data Storage
Optical Data Storage: Step by Step to Market (David J. Davies); May 1983 (17:5), p. 89.
Technology Trends 1983: Optical Data Storage; Jan. 1983 (17:1), p. 60.

Optical Design/Manufacture
Computer Control for Grinding and Polishing (Robert A. Jones); Aug. 1983 (17:8), p. 34.
Diamond Machining's Impact on Rotating Scanners (William Caithness/Johanna Eisenberg/A. Winston Naugler); Aug. 1983 (17:8), p. 65.
Optical Fabrication: Changing Faces in Aspherics (Robert K. Parks); June 1983 (17:6), p. 67.
Optical System, The Well-Adjusted (D. Allan Roberts); Oct. 1983 (17:10), p. 52.

Fibre Optics

Whatever the conditions our Reflectometers can diagnose your problems!

Our family of Reflectometers are designed for the fault location, length measurement and optical path characterisation of optical fibres, requiring access to one end only of the fibre under test. They operate by measuring the delay and amplitude of reflections returned from short high intensity pulses of light launched into the fibre.

The current range consists of the OFR3/850nm, OFR3/905nm and the OFR5/1300nm for multi-mode fibre measurement. A new model for single-mode fibre measurement, the OFR6, is to be introduced shortly.

They offer the following features:
- Detects backscattered light from one end of the fibre.
- High peak power laser emitter.
- Choice of emission wavelengths.
- Laser safety interlock.
- Microprocessor control.
- Portable, rugged construction, with integral CRT and printer.
- User-friendly operation.
- Ferrule/'V' groove optical connection.
- Battery inverter available.

The Most Expensive High Vacuum Lubricant in the World.™

TorrLube...

TorrLube™

- Unsurpassed Lubricating Qualities at 10^{-8} and below.
- Extends Rotating Vacuum Seal Life 36 times (standard Viton™ 'O' ring) and 54 times plus with Viton Quadring.
- Outgassing Rate Less Than Unbaked Viton.
- Fine Tip Applicator Allows Precise Lubrication of Restricted Areas.
